PAMECO 9-meter propeller agitator

The durable and high-quality Pameco sludge processing equipment is perfect for demanding conditions and has been designed to withstand even heavier use

- Total length 9.15 meters
- Three-blade propeller, diameter 77 cm
- Required power min. 80 kw
- Painted with two-component epoxy polyurethane paint
- The shaft is furnished with bearings at four points. All bearings are designed for lubrication.
- * Sturdy collar step bearing on the end.
- * The shaft is furnished with polyoxymethylene (POM) bearings at three points in between.
- * All bearings can be replaced easily without removing the shaft.
- The thrust bearing of the propeller is made from bronze
- Each propeller agitator is carefully tested.

The propeller agitator can also be manufactured with different dimensions based on demand.
